

Take part in Tomorrow's Engineers Week and let your students have a say on the future of engineering!

You and your students are invited to take part in the 10th annual [Tomorrow's Engineers Week](#) (#TEWeek22), 7 to 11 November. This year, the Week will focus on how engineering will help shape the world in the next decade.

Join the Tomorrow's Engineers Week Future Minds conversation

The first ever **Tomorrow's Engineers Week Future Minds** will be the highlight of the Week, bringing together schools from across the UK to explore how engineers and engineering are at the heart of shaping the world over the next decade, in particular looking at 4 sectors: entertainment, sport, technology and the environment.

[Register to watch the Future Minds broadcast and get lesson plans](#)

We'll provide you with a **30-minute broadcast** (available from **7 November**), in which you'll hear from inspirational engineers working in entertainment, sport, technology and the environment, as well as lesson plans to help you incorporate the film into the school day.

Your students are invited to contribute to the conversation, vote for their favourite ideas and provide their own recommendations on future engineering innovations and how engineering will help shape the world.
