STEMAZING
INCLUSIVE OUTREACH

#inspirethefuture #bethechange
OUR STEMAZING MISSION

To empower women in STEM to shine as visible role models and inspire our next generation of innovators and problem-solvers.

Two key themes:

“"You can’t be what you can’t see"
BEING A DEAF STEM AMBASSADOR

Challenges:
• Confidence
• Imposter syndrome
• Very honestly - fear!
• Communication barrier / noise levels

What has helped:
• STEMAZING - gives skills, support and most importantly confidence.
• Being in a community with other female role models that lift each other up.
• Building experience - being recommended for opportunities.
BEING AN AUTISTIC STEM AMBASSADOR

Challenges:
• Getting overloaded.
• Accommodating problems or changes.
• Noise in classroom - I have no filter system.
• Confidence.

What has helped:
• Support from STEM Learning hub and others.
• Saying yes to opportunities.
• Desire to help others.
• Drive to be visible - not many openly Autistic STEM ambassadors out there.
THANK YOU
